

SecurityCenter™

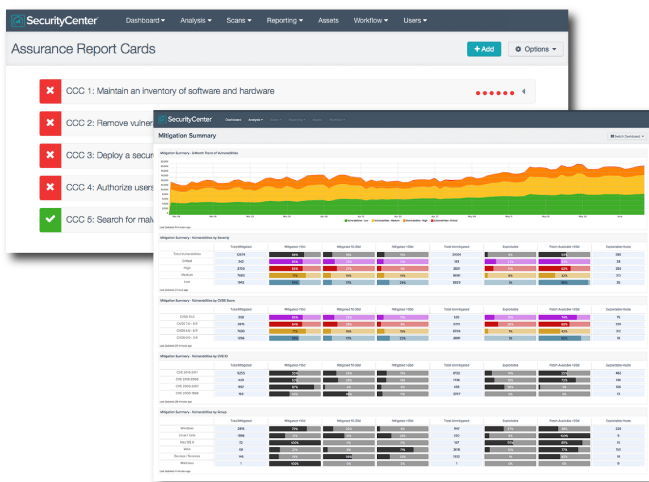

The SecurityCenter™ platform provides the most comprehensive and integrated view of enterprise security posture to reduce business risk and ensure compliance

Next-Generation Vulnerability Analytics Solution

SecurityCenter™ is a comprehensive vulnerability analytics solution that provides complete visibility into the security and compliance posture of your distributed and complex IT infrastructure. SecurityCenter does this through advanced analytics, customizable dashboards/reports, and workflows to identify weaknesses on your IT assets, by identifying all vulnerabilities, misconfigurations and malware on them.

SecurityCenter's vulnerability analytics engine evaluates the vulnerability data gathered across multiple Nessus® scanners distributed across your enterprise, illustrates vulnerability trends over time, and assesses risk and to prioritize the actions needed. Finally, SecurityCenter includes a configurable workflow engine that helps your security team speed up response and remediation, to reduce overall risk and streamline compliance.

SecurityCenter™ includes Assurance Report Cards (ARCs), which enable you to continuously measure, analyze, and visualize the effectiveness of your security program, based on high-level business objectives and underlying customizable policies that CISOs and executives care about.

SecurityCenter™ provides highly customizable vulnerability analytics, trending, reporting, and workflows to suit the needs of your security program

Key Benefits

- Identify weaknesses by scanning all assets for known vulnerabilities, misconfigurations, and malware
- Assess how well patch management is working based on vulnerability trends over time
- Rapidly respond to changes with configurable alerts, notifications, and automated actions
- Measure security posture based on security policies that aligned with high level business objectives
- Streamline compliance for the widest range of regulatory/IT standards and best practices
- Stay up to date with Tenable provided content

Tenable Research

The Tenable Research team provides frequent updates of vulnerability and threat intelligence, advanced analytics, security/compliance policies, dashboards, reports and Assurance Report Cards to all SecurityCenter customers. This out-of-the box content is based on industry and customer best practices gathered by Tenable, putting the power of our security research team at your disposal. This content is part of the SecurityCenter subscription.

Key Features

- **Assurance Report Cards:** continuously measure effectiveness of customer-defined security policies based on high-level business objectives to identify and close potential gaps.
- **Highly customizable dashboards/reports:** with new HTML5 based user interface to satisfy specific needs of CISOs, security management, analysts, and practitioners/operators.
- **Broad asset coverage:** Assess servers, endpoints, network devices, operating systems, databases, and applications in physical, virtual and cloud infrastructures.
- **Dynamic asset classification:** group assets based on policies that meet specific criteria; e.g. Windows 7 assets with vulnerabilities > 30 days old.
- **Vulnerability management:** multiple scanning options, including non-credentialed and credentialed scanning for deep analysis and configuration auditing.
- **Agent-based scanning** is available for organizations to more easily scan mobile and hard to reach assets.

- **Managed security posture:** scan hosts, virtual, mobile, and security devices for vulnerabilities, misconfigurations and malware using customizable schedules and black-out windows.
- **Cumulative scan results:** consolidate data from multiple on premise Nessus® scanners and provide remediation trending information.
- **Advanced analytics/trending:** provide contextual insight and actionable Information to prioritize security issues associated with security posture of all enterprise assets.
- **Incident Response/Workflows:** configurable workflows and alerts for administrators to take manual actions via emails, notifications, trouble tickets, or take automated actions.
- **Tiered management model:** support for organizations that distribute responsibilities across multiple geographies and teams using role-based access control.
- **Automated load balancing:** optimize (parallelize) scan cycles in distributed environments.
- **Integration:** use SecurityCenter APIs to automate integration with existing infrastructure to enable centralized management, reporting, remediation, and workflows.
- **Streamlined compliance:** pre-defined checks and against industry standards and regulatory mandates, such as CERT, DISA STIG, DHS CDM, FISMA, SCADA, PCI DSS, HIPAA/HITECH and more.

SecurityCenter™ Editions

SecurityCenter™

SecurityCenter™ is the next-generation vulnerability analytics solution that includes multiple Nessus scanners, the world's most widely deployed vulnerability scanner. It provides the most comprehensive visibility into the security posture of their distributed and complex IT infrastructure.

SecurityCenter™ Continuous View

SecurityCenter™ Continuous View is the market-defining continuous network monitoring platform. It integrates SecurityCenter™ along with multiple Passive Vulnerability Scanner (PVS™) network sensors, and Log Correlation Engine (LCE™) to provide comprehensive continuous network monitoring.

Capabilities	SecurityCenter	SecurityCenter CV
Centralized vulnerability management with multiple scanners	✓	✓
Dynamic asset classification (mail server, web server, etc.)	✓	✓
Policy-based configuration auditing	✓	✓
Malware detection with built-in threat Intelligence	✓	✓
Pre-defined dashboards/reports with automatic feeds from Tenable	✓	✓
Incident response with configurable alerts, notifications, ticketing	✓	✓
Assurance Report Cards (ARCs)	✓	✓
Continuous asset discovery (virtual, mobile, cloud)		✓
Passive vulnerability detection of new and "unsafe-to-scan" assets		✓
Real-time detection of botnet and command & control traffic		✓
Anomaly detection using statistical/behavioral techniques		✓
Streamlined compliance with proactive alerts on violations		✓
