

User Awareness Training (UAT) and Phishing Simulation Managed Service

End user awareness training is a vital practice for modern-day security. With Satisnet's UAT and Phishing Simulation Managed Service, strategically test your users with phishing and awareness campaigns, using content that's regularly updated with the latest threats.

Service Features

Satisnet implement the user awareness platform and advise on how to ensure a smooth rollout

Simulated phishing email campaigns throughout the year based on attacks observed within your industry

Adaptation of salutations and content of campaigns tailored to your organisation

Advanced scheduling of campaigns

Advanced customisation engine

Regular business reviews to optimise the service

Fully customisable user awareness and phishing campaigns strategically tailored for your organisation

Customised spear phishing simulations specifically customised to your organisation

Active Directory integration for automated handling of joiners and leavers

Advanced support for admins and end users

Analytics dashboard and benchmarking

Company policy management with tracking and reports

The Satisnet UAT and Phishing Simulation Service provides best-in-class awareness training to not only strategically test your users, but to ultimately keep security at the forefront of minds.

Satisnet do not offer a 'cookie cutter' approach to MSSP Services. Instead, we partner with, and tailor our services to, your organisation in order to optimise tooling, people, processes, and costs to fit your exact requirements.
