

# Transform Your Security Program with Comprehensive Solutions from Tenable

## A Special Invitation

If you're a McAfee Vulnerability Manager (MVM) customer, we invite you to transform your security program with a free, one-year subscription to Tenable SecurityCenter (512 IP License).

## Make the Switch to SecurityCenter

Instead of blind spots, false positives and more work, Security Center enables you to secure smarter.

## Experience the Tenable Difference Today

### Make the Move in Three Steps:

- 1 Produce a current purchase agreement/contract that shows you are an existing MVM customer.\*
- 2 Make the move with a free, one-year subscription to Tenable SecurityCenter.
- 3 Start with four hours of free, remote professional services and on-demand training to accelerate your transition from McAfee Vulnerability Manager to Tenable SecurityCenter.

## The Tenable Difference:

### The Platform Powered by Nessus

- **See everything with greater focus** – complete visibility through active scanning, passive scanning, agents, logging – Tenable delivers the broadest asset coverage, including hard-to-scan transient systems
- **Continuous context with advanced analytics** – focus in on the critical data and actions that matter most
- **Greater efficiency, and effectiveness** – integrated with patch management, mobile device management, and mitigation applications, SecurityCenter provides centralized management reporting, remediation, and workflows
- **Threat-focused IT Control** – Protect the business, nonstop, with rapid response and Assurance Report Cards, and demonstrate that security (and you) help the business without hindering it
- **Security assurance** – security analytics and reporting deliver actionable information to prioritize security issues and enable meaningful reporting to executives
